PSB #2012-05

TO: Goodyear Company Owned Stores, Independent and Associate Dealers & Goodyear Canada Inc. Dealers

Subject: P235/55R17 Eagle RS-A 98W VSB - Law Enforcement Applications

Goodyear supplies two tires of the same size and type for two different law enforcement vehicles. One tire is tuned specifically for the 2006 through 2012 model years Ford Crown Victoria Police Interceptor and the other is tuned specifically for 2012 and later model years Chevrolet Impala Police Vehicle.

See the table below for details concerning these tire applications.

Size	Index	Type	Application	Product Code	TPC Spec Code
P235/55R17	98W	Eagle RS-A	Ford Crown Victoria	732-002-500	1184MS
P235/55R17	98W	Eagle RS-A	Chevrolet Impala	732-297-500	1408MS

It is recommended that the appropriate tire (product code) be applied to the vehicle for which it was designed. Substitutions would result in less than optimal ride and handling performance. Mixing of these two product codes on the same vehicle is not recommended. As always, to obtain the maximum handling and traction benefits, tires should be installed in sets of four.

For tires already installed on vehicles or tires that have no tire label check the TPC Spec code on the sidewall of the tire for proper application.

Please communicate this information to the associates in your organization who sell and service tires for Law Enforcement vehicles.
