Important Information To Better Serve Your Customers

This PSB is Applicable to: U.S. & Canada

September 12, 2016

PSB #2016-15

TO: Goodyear Company Owned Stores, Independent Goodyear Dealers and Associate Dealers in the U.S. and Canada

Subject: Replacement tires on the Chevrolet Tahoe Police Package, P265/60R17 108V Eagle RS-A

P265/60R17 108V Goodyear Eagle RS-A tires are applied as original equipment on the Chevrolet Tahoe Police Package. Goodyear is discontinuing product code 732-301-500 and replacing it with product code 732-523-500 (see table below).

Tire	Status	Material	Product Code	TPC
P265/60R17 108V Goodyear Eagle RS-A	To Be Discontinued	218830	732-301-500	1428MS
P265/60R17 108V Goodyear Eagle RS-A	New In-Line	231944	732-523-500	3135MS

Do not mix discontinued product with new product on the same axle. When only two tires are being replaced, the new Eagle RS-A tires, whether discontinued or new product, must be applied to the rear axle.

To obtain the maximum handling and traction benefits, tires should be installed in sets of four.

For tires already installed on vehicles or tires that have no tire label check the TPC Spec code on the sidewall of the tire for proper tire placement.

Please make certain all associates at your location are aware of this important information in order to provide quality service to your customers.
