Important Information To Better Serve Your Customers

This PSB is Applicable To: U.S. and Canada

October 26, 2021

PSB #2021-11

TO: Goodyear Company Owned Stores, Independent Goodyear Dealers, G3X Dealers, Wholesale Distributors & Goodyear Canada Inc. Independent Dealers

SUBJECT: Replacement Tires for Law Enforcement and Police Pursuit Vehicles

Due to the unique nature and operation of Law Enforcement and Police Pursuit vehicles, when replacing tires, it is essential that all four tires be of the same tire line, size, load index, speed rating, and construction (radial or bias). Do not mix tire lines or different tire manufacturers and use only tires listed for Law Enforcement and Police Pursuit vehicle applications.

Examples: Eagle Enforcer All Season tires must be replaced with Eagle Enforcer All Season tires and **not** mixed with a different tire line or different tire manufacturers, e.g., Eagle RS-A or Eagle Enforcer All Weather or Firestone, General, etc.

Also, Eagle Enforcer Winter tires must not be mixed with Eagle Ultra Grip GW3 or a different manufacturer's tires.

If one tire is needed, tires should be replaced in pairs with the newest tires installed on the **REAR** axle, regardless of the drive axle configuration (front, rear, or all-wheel drive).

A full list of all Goodyear tires, recommended for Law Enforcement and Police Pursuit vehicle applications, can be found on Tire-HQ under Government Sales or online at www.policetires.com.
